

Micro S Light+

Air-Powered Rehab Cutter

Performance to Keep You Profitable

Balancing capability and value, the Micro S Light+ is the perfect tool to tackle lucrative small-diameter rehab work.

The head of this powerful cutter travels as far as 164' in 3-9" lines[†]. Once in position, it clamps pneumatically and offers joystick control for three axes of motion:

- 400-degree rotation
- 90-degree swivel
- 4" axial feed

Perfect for both horizontal and vertical work, the Micro S Light+ fits in small access openings and snakes through 4" lined elbows.

An onboard, self-cleaning camera provides live visual feedback on a 10" touchscreen monitor. Pressurized with nitrogen, the sealed head carries an IP54 rating, accepts various cutting bits, and detaches for easy transport. The entire system travels on a wheeled cart weighing just 104 lb.

[†]3-6", or up to 9" with optional extension.

 3-9" diameters [†]	 164' reach	 3 cutting axes	 4" elbow turns	 Horizontal + Vertical orientations
