

NANO E

**The ideal entry level milling robot.
Built for bends.**

The NANO E from IMS Robotics is a compact, electrically powered milling robot engineered for in-house use and small-diameter lines. It navigates and cuts in 90° bends, even lined pipes.

With an exceptional price-to-performance ratio and easy operation, the NANO E is ideal for contractors looking to upgrade from smaller systems to a more robust solution.

Portable & Practical

Lightweight and mobile, the NANO E can be transported by a single person—even in the trunk of a car. Battery-powered with up to 6 hours of runtime, it delivers power and productivity wherever the job takes you.

Line Size	3" - 4"
Hose	164'
Control	Manual, 2 joysticks Ergonomic
Display	7" monitor Recording function
Power	2 x 270 Wh battery power

Quiet. Compact. Ready to Work.
