

Nano Easy

Compact Air Powered Cutter for Small Lines

Our most compact model, the Nano Easy can be pushed horizontally or dropped vertically down small lines. With rotation and distance controlled manually, this cutter maintains a low profile that allows it to snake past bends in the pipe. The Nano makes reinstating laterals quick and easy.

- Single bladder robot for stabilization
- Separate controls for lift arm and air motor
- Handlebar-style clamp on controller for rotation
- 3.5" LCD monitor with SD recording
- Integrated camera
- One continuous hose

Trust PRT cutters to give you the cutting power you need to reinstate connections from lateral lines. Using powerful air motors, PRT cutters make quick work of any material they face.

Specs

Line Size	3" - 4"
Hose Length	82'
Propulsion	Push
Control	Manual
Display	3.5" LCD monitor, SD record
Weight	95 lbs
Dimensions	26" W x 22" D x 33" H handle extends to 47" H
